BS

“ My sister Joan endured 82 days in the Burn Center after her accident on July 12th, 2017. She went through many skin graft procedures and lots of pain. Her will to live is proven in how many days she survived. Her heart was strong but it couldn't overcome the extensive burn injuries. I went to see her a few days ago and she miraculously answered me when I shouted to her. She opened her eyes and then moved her injured arm. The doctors were amazed at her determination but she couldn't continue on this road. She finally passed away on October 2nd, 2017 and now; no more pain, no more suffering, no more MS, no more Lupus. She's in heaven now with Mom and Dad. We will all miss her.  
Good-bye Joan....
